Basic functionality tests

The output of the CREAM Test suite based on robot (see here for details) is available here.

Regression tests

- Bug #79026 (config_cream_sudoers creates wrong sudoers file when the same gid is shared)
HOPEFULLY FIXED

Verified that the proposed patch has been implemented, but non easy to replicate that scenario (sharing of the same gid among multiple VOs) in our environment.

- Bug #81561 Make JobDBAdminPurger script compliant with CREAM EMI environment. FIXED

Tried to use the JobDBAdminPurger.sh. It worked without reporting any issues:

```
# JobDBAdminPurger.sh -c /etc/glite-ce-cream/cream-config.xml -u xxxxx -p yyyy -s DONE-OK,0
START jobAdminPurger
-----
Job CREAM484355573 is going to be purged ...
- Job deleted. JobId = CREAM484355573
CREAM484355573 has been purged!
-----
STOP jobAdminPurger
```

Cream1133TestingReport < CREAM < TWiki

- Bug #83238 (Sometimes CREAM does not update the state of a failed job) FIXED

Manually killed a job. Verified that the job output is:

```
***** JobID=[https://cream-35.pd.infn.it:8443/CREAM181001530]
Status      = [DONE-FAILED]
ExitCode    = [N/A]
FailureReason = [Job has been terminated (got SIGTERM)]
```

- Bug #83749 (JobDBAdminPurger cannot purge jobs if configured sandbox dir has changed) FIXED

Submitted some jobs and then reconfigured the service with a different value of CREAM_SANDBOX_PATH. Then purged, with the JobDBAdminPurger.sh script, purged some jobs submitted before the switch.

Verified that:

- that the jobs have been purged from the CREAM DB (i.e. a glite-ce-job-status should not find them anymore)
- that the relevant CREAM sandbox directories have been deleted
- Bug #84374 (yaim-cream-ce: GlueForeignKey: GlueCEUniqueID: published using : instead of=) FIXED

```
$ ldapsearch -h cream-35.pd.infn.it -x -p 2170 -b "o=grid" | grep -i foreignkey | grep -i glueceu
GlueForeignKey: GlueCEUniqueID=cream-35.pd.infn.it:8443/cream-lsf-creamtest1
GlueForeignKey: GlueCEUniqueID=cream-35.pd.infn.it:8443/cream-lsf-creamtest2
GlueForeignKey: GlueCEUniqueID=cream-35.pd.infn.it:8443/cream-lsf-creamcert1
```

Entries have the right format:

```
GlueForeignKey: GlueCEUniqueID=<CREAM CE ID>
```

- Bug #86191 (No info published by the lcg-info-dynamic-scheduler for one VOView) FIXED

Verified that:

```
ldapsearch -h cream-35 -x -p 2170 -b "o=grid" | grep -i GlueCEStateWaitingJobs | grep -i 444444
```

doesn't return anything

- Bug #87361 ([yaim-cream-ce] The attribute cream_concurrency_level should be configurable via yaim) FIXED

Set in seiteinfo.def the variable CREAM_CONCURRENCY_LEVEL to 40. After configuration verified that in /etc/glite-ce-cream/cream-config.xml there is:

```
cream_concurrency_level="40"
```

- Bug #87492 (CREAM doesn't handle correctly the jdl attribute "environment") FIXED

Submitted the following JDL using glite-ce-job-submit:

```
Environment = {
"GANGA_LCG_VO='camont:/camont/Role=lcgadmin'",
"LFC_HOST='lfc0448.gridpp.rl.ac.uk'",
"GANGA_LOG_HANDLER='WMS'"
};
executable="/bin/env";
```

Regression tests

```
stdoutput="out.out";
outputsandbox={"out.out"};
outputsandboxbasedesturi="gsiftp://localhost";
```

When the job was in done status, retrieved the output and checked that in `out.out` the variables `GANGA_LCG_VO`, `LFC_HOST` and `GANGA_LOG_HANDLER` have exactly the values defined in the JDL.

Performance and scalability tests

See here for more information on these tests.

Description: Simple submission with polling

Standard compliance and conformance tests

Glue 1.3 and Glue 2.0 standard compliance is tested through Glue validator

Description: Glue 1.3 Conformance test

Summary : FAILED

Glue validator output is here.

The reported errors (which are not a serious problem) are due to bug #88720 in the LSF info provider (CREAM LSF module). These are not new errors (i.e. they haven't been introduced by this update).

Description: Glue 2.0 Conformance test

Summary: PASSED

Glue validator output is here
