TESTs on ICE

15) Test starts on Thu Mar 19 at 12:00:57 CET 2009 (WMS: wms008)

Description:

- 7200 collections each of 40 jobs
- One collection every 60 seconds
- Five users
- max_ice_threads = 20
- Used all the CEs of testbedB (except cert-06.cnaf and cream-21.pd)
- Used automatic-delegation and proxy renewal service (MyProxyServer = "myproxy.cern.ch")
- Proxy has 5 hours of lifetime (and it is renewed every 4 hours)
- The job is a "sleep 313"
- Resubmission is enabled
- Lease mechanism is not used
- Use rpms from patch #2459

Test finishes on Tue Mar 24 at 11:56:59 CET 2009

- 3750 collections submitted in 37283 seconds: 5/9/38 secs (min/avg/max)
 - ◆ 3450 submission fail due to *System load is too high*

Final results taken on Fri Mar 24 at 13:44:29

- Collections correctly submitted: 3750 (150000 jobs)
 - ◆ DONE OK: 145210 (96.81%)
 - ◆ ABORTED: 611 (0.41%)
 - ◆ NotDone: 4179 (2.78%)
 - ◆ Resubmitted: 1283 (0.86%)
- Errors found (3191):
 - ◆ BLAH error (201 times 6.3%)
 - ◆ Cannot move ISB (569 times 17.83%)
 - ◆ Cannot move OSB (148 times 4.64%)
 - ◆ Transfer to CREAM failed (**1895 times 59.39%**)
 - ◆ Cannot take token (50 times 1.57%)
 - ◆ Proxy is expired (315 times 9.87%)
 - ◆ Isf_reason (9 times 0.28%)
 - ◆ blparser service is not alive (3 times 0.09%)
 - ◆ pbs_reason (1 time 0.03%)
- All the aborted (and also the majority of the failures) are due to "proxy renewal" mechanism which doesn't work at the beginning of the test.
- All the "NotDone" jobs are matched to a single ce (cert-05.cnaf.infn.it), which has some problems under investigation.

14) Test starts on Fri Mar 13 at 11:44:57 CET 2009 (WMS: wms008)

Description:
