

Register to a VO

Users need to be authenticated and authorized in order to get access to grid resources. To this end, users need to be members of one or more Virtual Organisations (VOs) through subscription to the relevant VOs. A VO is a user group where members are usually in similar or related research activities, or are part of the same collaboration, for which reason they typically need of the same application software on the grid and have similar middleware requirements.

VOs can be national or global in scope. VOs are described by a VO Identification card. The list of VOs enabled in the pan-European grid infrastructure, the respective discipline cluster, the list of VOs that are currently enabled in IGI can be consulted on the Operations Portal . Click here for more information on the scientific disciplines supported by IGI and the European Grid EGI.

Become a VO member

To be VO member a registration request needs to be submitted and then approved by the respective VO manager.

Please select the VO of interest in the table below and click on the respective cell to start the registration process.
