=head1 NAME

CGI::Session::ErrorHandler - error handling routines for CGI::Session

=head1 SYNOPSIS

```
require CGI::Session::ErrorHandler @ISA = qw( CGI::Session::ErrorHandler );
```

```
sub some_method { my $self = shift; unless ( $some_condition ) { return $self->set_error("some_method():  
\$some_condition isn't met"); } }
```

=head1 DESCRIPTION

CGI::Session::ErrorHandler provides set_error() and errstr() methods for setting and accessing error messages from within CGI::Session's components. This method should be used by driver developers for providing CGI::Session-standard error handling routines for their code

=head2 METHODS

=over 4

=item set_error(\$message)

Implicitly defines \$pkg_name::errstr and sets its value to \$message. Return value is B undef.
