Templates for the MailInContrib

DO NOT MODIFY THIS TOPIC

This is a normal TWiki topic, but it is also a template file, as described in TWikiTemplates. It contains the template definitions used by the MailInContrib to insert mail messages in topics.

Each template is specified in the form of a pair of TWiki template definitions, (surrounded by verbatim tags below for readability). The template to use when inserting incoming mail in a topic is decided from the parameters in the <--MAIL--> comment in the topic. The default template is =normal.

```
%TMPL:DEF{MAILIN:normal}% * *%SUBJECT%*: %TEXT% -- %WIKIUSERNAME% - %SERVERTIME%%ATTACHMENTS%
%TMPL:END%
```

%ATTACHMENTS% in the previous template will be expanded to a list of attachments that came in the mail. Each attachment in the list is formatted by the following template:

```
%TMPL:DEF{MAILIN:normal:ATTACHMENT}% * %A_FILE%
%TMPL:END%
```

DO NOT MODIFY THIS TOPIC

If you want to modify or add any templates, create the TWiki topic MailInContribUserTemplate. This topic is automatically included here if it exists, but it is **not** shipped with the MailInContrib. Any templates you define in MailInContribUserTemplate will override those defined here.

```
%TMPL:INCLUDE{"MailInContribUser"}%
```
