My Personal Preferences

- Show tool-tip topic info on mouse-over of WikiWord links, on or off:
 - ◆ Set LINKTOOLTIPINFO = off
- Preference for the editor, default is the WYSIWYG editor. The options are raw, wysiwyg:
 - ◆ Set EDITMETHOD = wysiwyg
- More preferences TWiki has system wide preferences settings defined in TWikiPreferences. You can customize preferences settings to your needs: To overload a system setting, (1) do a "raw view" on TWikiPreferences, (2) copy a `Set VARIABLE = value` bullet, (3) do a "raw edit" of your user profile page, (4) add the bullet to the bullet list above, and (5) customize the value as needed. Make sure the settings render as real bullets (in "raw edit", a bullet requires 3 or 6 spaces before the asterisk).

Notes to TWiki Administrator:

Anything inside this "templateonly" section will not be copied to the home topic of the new user. It is a resource for the administrator to tailor the users home topic.

The default topic text above is for English speaking users. If you have a multilingual wiki community you can replace the "My Links", "Personal Preferences" and "Related Topics" sections above with the localized text below. Text enclosed in *%MAKETEXT* will be shown in the language selected by the user. Please note that the *%MAKETEXT* can be quite intimidating to new users. Consider translating above text to your own language if your community uses a non-English language. (Remove all text from `%STARTSECTION{type="templateonly"}%` to `%ENDSECTION{type="templateonly"}%` when you are done)

Text for multilingual wiki community, copy from here to `%ENDSECTION{type="templateonly"}%`
