QuickMenu is Disabled!

Why is the QuickMenu disabled?

The QuickMenuSkin requires a browser with Javascript enabled. Without Javascript the menu will not load and the usual links will not be accessible. This makes navigating through the TWiki difficult.

Solution

You have 2 choices:

- Use a browser that has javascript enabled.
- Use a different TWiki skin like: PatternSkin or ClassicSkin
To activate a skin see: TWikiSkins

 TWikiSkinBrowser lists all the skins installed on your server.
