Edit tables with EditTablePlugin

The EditTablePlugin allows you to edit TWiki tables using edit fields and drop down boxes. Tables have an [**Edit**] button if preceded by an %EDITTABLE{ . . . }% variable. Each column can be a text field, a drop down box, a date field, etc. Multiple tables per topic are editable, but only one at a time can be edited.

Example:

```
Syntax: %EDITTABLE{ format="| row, -1 | text, 20, init | select, 1, one, two, three, four | radio, 3, :-), :-I, :-(| label, 0, %SERVERTIME{"$day $mon $year $hour:$min"}% |" changerows="on" }%
```

Nr	Text field	Drop down	Mood	Timestamp
1	hello table	one	☺	26 Jun 2002 12:30
2		two	☹	27 Jun 2002 12:40
