

---+ Package TWiki::UI::RDiff

UI functions for diffing.

## StaticMethod diff (\$session, \$web, \$topic, \$query)

diff command handler. This method is designed to be invoked via the UI::run method.

Renders the differences between version of a TwikiTopic

topic	topic that we are showing the differences of	
rev1	the higher revision	
rev2	the lower revision	
render	the rendering style {sequential, sidebyside, raw, debug}	(preferences) DIFFRENDERSTYLE, sequential
type	{history, diff, last} history diff, version to version, last version to previous	history
context	number of lines of context	
skin	the skin(s) to use to display the diff	

TODO:

- add a {word} render style
- move the common CGI param handling to one place
- move defaults somewhere
