

LANGUAGE -- current user's language

- Returns the language code for the language used as the current user. This is the language actually used by TWiki Internationalization (e.g. in user interface).
 - The language is detected from the user's browser, unless some site/web/user/session-defined setting overrides it:
 - ◆ If the LANGUAGE preference is set, it's used as user's language instead of any language detected from the browser.
 - ◆ Avoid defining LANGUAGE at a non per-user way, so each user can choose his/her preferred language.
 - Related: LANGUAGES
