

## LANGUAGES -- list available TWiki languages

- List the languages available (as PO files) to TWiki. Those are the languages in which TWiki's user interface is available.
- Syntax: %LANGUAGES{...}%
- Supported parameters:

Parameter:	Description:	Default:
format	format for each item. See below for variables available in the format string.	" * \$langname "
separator	separator between items.	"\n" (newline)
marker="selected"	Text for \$marker if the item matches selection	"selected"
selection="%LANGUAGE%"	Current language to be selected in list	(none)

- format variables:

Variable	Meaning
\$langname	language's name, as informed by the translators
\$langtag	language's tag. Ex: en, pt-br, etc.

- Example: `<select>%LANGUAGES{format="<option $marker value=' $langtag '>$langname</option>" selection="%LANGUAGE%" }%</select>` creates an option list of the available languages with the current language selected
