Welcome, TWikiGuest!

Welcome to TWiki! This is a TWikiSite (pronounced *twee-kee site*), a meeting place to work on common interests. Anyone can contribute using any web browser. TWiki looks like a normal web site... except that it encourages contribution and **editing** of pages, questions, answers, comments and updates.

"Wiki" systems are fundamentally editable web pages. It's a fun and useful way of communicating asynchronously over the web for many existing intranet and public Internet sites. TWiki is simple to learn and use. It aims to provide a transparent way for you to publish and exchange your ideas with others over the web.

What's in a TWiki?

- **Webs:** A TWikiSite is divided into webs, each one represents a workspace for collaboration. This site has the following webs: CEMon, CREAM, Cloud, Cyclops, DGAS, EgeeJra1It, Gows, GridOversight, IGIPortal, IGIRelease, MPI, Main, MarcheCloud, MarcheCloudPilotaCNAF, Middleware, Operations, Sandbox, Security, SiteAdminCorner, TWiki, Training, UserSupport, VOMS, WMS, WMSMonitor, WeNMR
- **Topics:** Each web is made up of hyperlinked topics (wiki pages) that appear in your browser.

Some things to do

- **Browse.** This is a site like other sites. Read and follow interesting links.
- **Write.** Speak your mind! From your browser you can change or add to anything you see in a TWiki topic. Modify content with an easy to use WYSIWYG editor.
- **Experiment.** Visit the Sandbox web and create as many topics as you like.
- **Organize.** You can learn to use TWikiForms and formatted searches with SQL-like queries to include topic information - for example, classify pages by subject, status, or date.
- **Learn more.** Some good places to start:
 - ◆ TWikiTutorial is a 20-minute tour of TWiki essentials.
 - ◆ ATasteOfTWiki is a short introduction training course for beginners.
 - ◆ WikiReferences links to selected articles and books about wiki technology and online collaboration.
 - ◆ WikiSyntax - simple wiki syntax for those using raw edit instead of WYSIWYG editor
 - ◆ GoodStyle - recommendations for edits

Some basics

Editing a topic

- Click **Edit** at the top or bottom of any topic and make your changes.
Note: Don't worry if you make a mistake. Everything is version controlled, you can easily go back in time.
- Click **Save** - you've now updated the topic!

Creating a new topic

- See a red-colored WikiWord? That means that there's no topic yet for that NewWikiWord61153. Simply click on the red-link to create a topic with that name. Add your content and save. Done!
- To create your own topic, invent a BrandNewWikiWord name and put it into an existing topic. Click on the red-link of BrandNewWikiWord to create the topic.

Viewing the history of a topic

- Click **History** at the bottom of a topic.

Attaching files and images

- Click **Attach** to upload and attach any type of file.
- When attaching an image file (.gif, .png, .jpg), check the "link" checkbox to embed the image into the topic. Edit the topic to move/resize the image.

Embedding objects

- **Raw edit** a topic and paste YouTube videos, Twitter feeds and other objects.
