

TestICEProxy < WMS < TWiki

To verify the fix for the Vulnerability bug in ICE's proxy renewal (Advisory-SVG-2012-4073) I used the ICE RPM from

http://etics-repository.cern.ch/repository/download/registered/emi/emi.wms.ice/3.3.5/s15_x86_64_gcc412EPEL/glite-w and checked that the issue specified in the SVG 4073 has been fixed, even at the ICE start (starting in a situation in which the vulnerability is present).
